

LEAF KEY

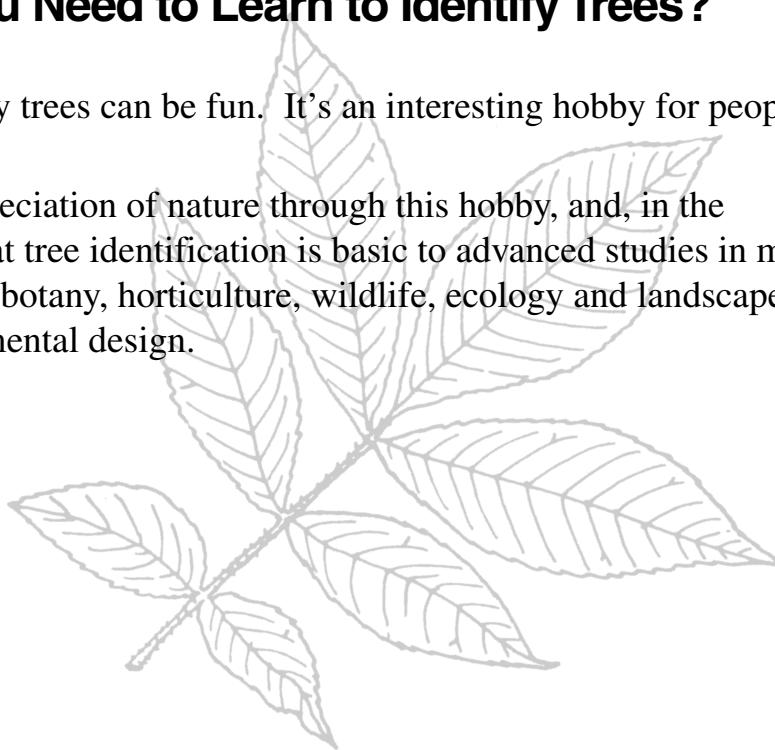

to common trees in Louisiana

Why Do You Need to Learn to Identify Trees?

Learning to identify trees can be fun. It's an interesting hobby for people of all ages.

You'll gain an appreciation of nature through this hobby, and, in the addition, you will find that tree identification is basic to advanced studies in many fields, including forestry, botany, horticulture, wildlife, ecology and landscape architecture and environmental design.

Leaf Key to Common Trees in Louisiana

How to Use the Leaf Key

It is easy to identify the common trees of Louisiana with this guide. Long words have been left out and pictures are used to identify the leaves instead of written descriptions.

Common trees include native and introduced trees from other parts of the United States or from foreign countries.

You can identify most tree leaves if you follow these steps:

1. Read the description at each numbered heading in the key on page 4 and by process of elimination find the group to which the leaf of any unknown tree belongs. Diagrams of the leaf characters used in the key are shown on page 5.
2. Turn to the picture numbers for this group. Leaf descriptions are repeated in the upper corner of the each page throughout the key.
3. Match the leaf with the picture it most closely resembles to find its name.

Helpful Hints

When you are collecting leaves, note and remember if the leaves are opposite or alternate on the twigs. Opposite leaves means that there will be leaves directly across from any leaf on the twig. Alternate leaves mean that there is no leaf directly across, but up and down the twig. Trees with alternate leaves also have alternate twigs and branches. Those with opposite leaves have opposite twigs and branches. Look carefully at several leaves and twigs or examine the branching habits of any tree to be identified. Frequently, a leaf, twig or branch may have died on an opposite leaved species, and the tree appears to be an alternate type.

All leaves have a bud for next year's growth at the base of the petiole or stem. A leaf in which there is only one blade is termed a simple leaf.

Compound leaves have more than one blade on a common stalk, and each of these blades is called a leaflet or little leaf. Compound leaves do not have buds at the base of the leaflets.

The leaves of all trees vary widely in size. Those on stump sprouts may often be three times larger than normal. Leaves will be smaller than usual during dry years. The illustrations have been drawn for the usual leaf sizes. You can see what the normal size is by examining the bracket at the side of each drawing. The bracket shows a one-inch scale.

The leaves of all trees vary greatly in the form. No two leaves on any single tree are precisely alike. Those on the lower branches may be somewhat different than those higher in the tree. Leaves of black oak, in particular, are extremely variable in form and shape. In using this key, try to pick a leaf that appears average in size and form for each tree.

Leaves of mulberry and sassafras trees may be either entire or lobed. Each is keyed out and illustrated under both headings.

Oak and hickory trees hybridize readily and the offspring of these crosses are difficult to identify. Hybrids of willow oak and southern red oak, for example, will often have leaves typical of both parents and all variations between them on a single branch. The parents of such hybrids can sometimes be determined by using two or more leaves that repeatedly show the widest variation in form.

A few Louisiana tree species have leaves almost alike. These will have an additional feature illustrated to aid in their identification.

Leaf Key

**Drawing Nos.
(Pictures)**

I. Leaves broad; definitely not needle-like or scale-like, mostly deciduous

A. Leaves alternate on the twigs

- 1. Leaves compound 1-26
- 2. Leaves simple
 - a. Leaf edge smooth 27-51
 - b. Leaf edge toothed 52-83
 - c. Leaves lobed 84-104

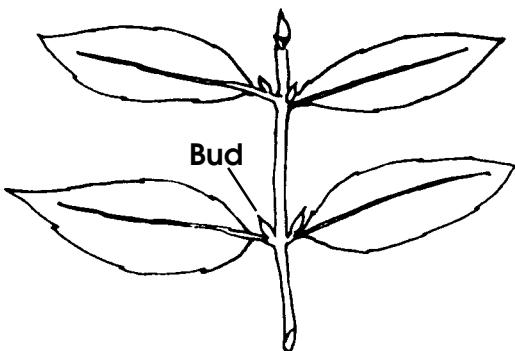

B. Leaves opposite on the twigs

- 1. Leaves compound 105-110
- 2. Leaves simple
 - a. Leaf edge smooth 111-118
 - b. Leaf edge toothed 119
 - c. Leaves lobed 120-123

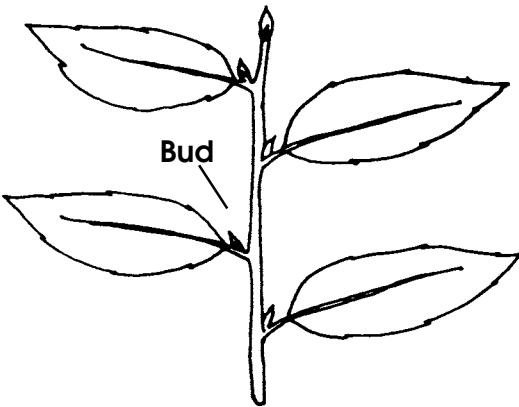

II. Leaves needle-like or scale-like; mostly evergreen

- A. Leaves needle-like 124-130
 - B. Leaves scale-like 131-132

Black Walnut

4. *Carya aquatica*
Water Hickory

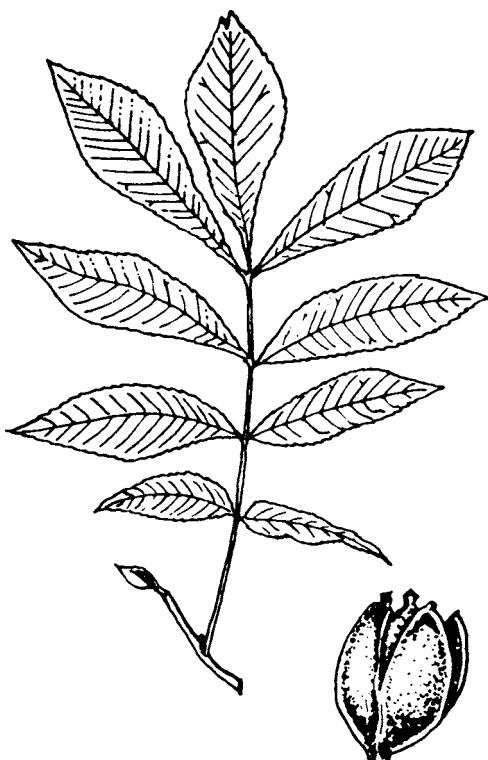

5. *Carya X lecontei*
Bitter Pecan

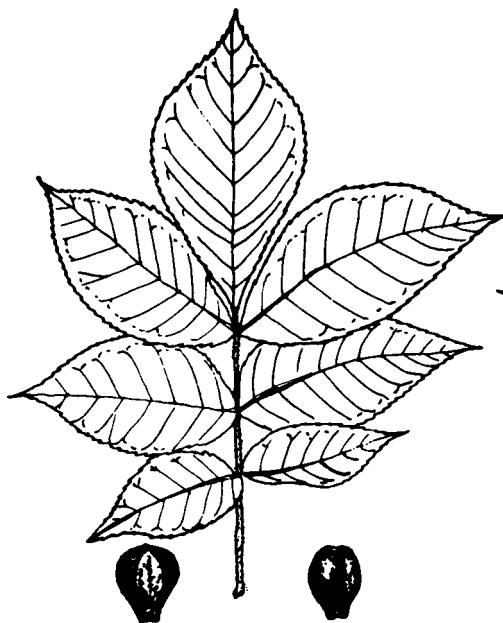

6. *Carya illinoensis*
Pecan

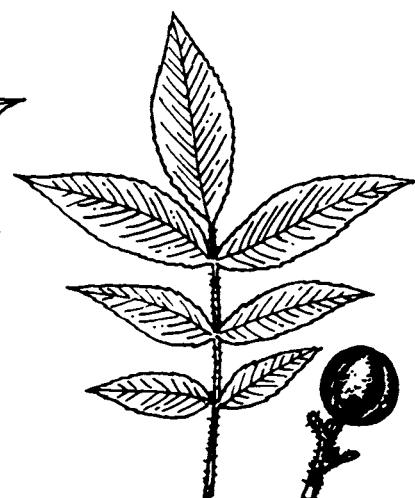

Alternate, Compound

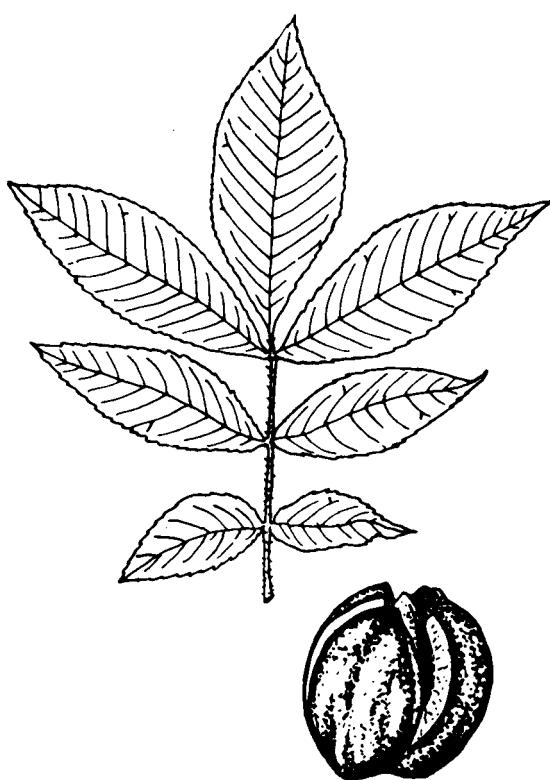

7. *Carya myristiciformis*
Nutmeg Hickory

8. *Carya glabra* var. *hirsota*
Swamp Hickory

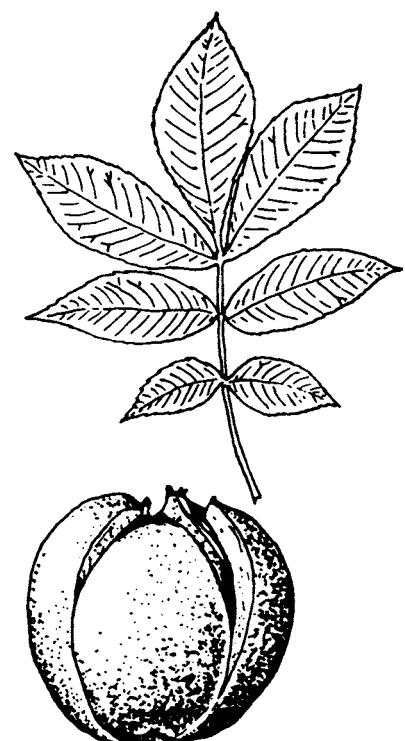

9. *Carya texana*
Black Hickory

10. *Carya alba*
Mockernut Hickory

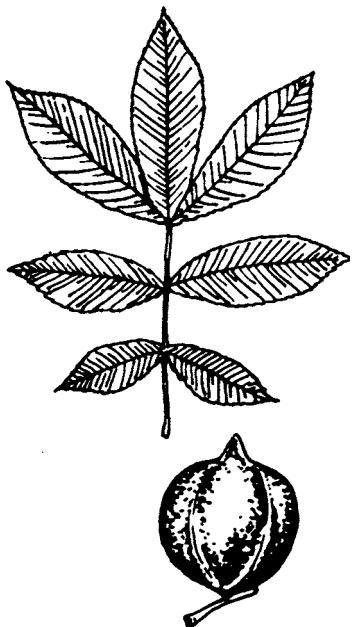

11. *Carya pallida*
Sand Hickory

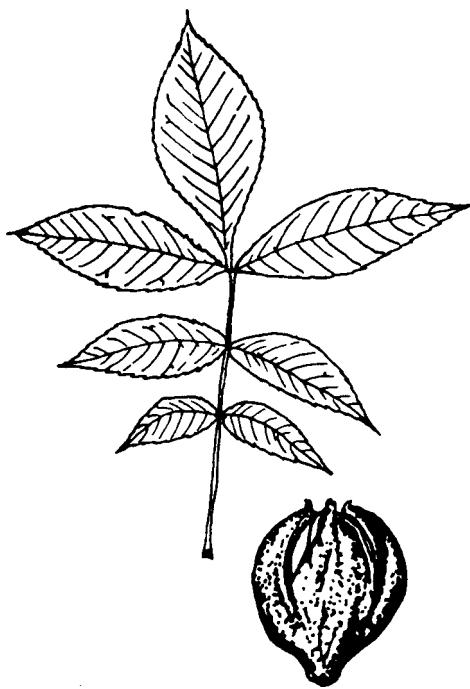

12. *Carya laciniosa*
Shellbark Hickory

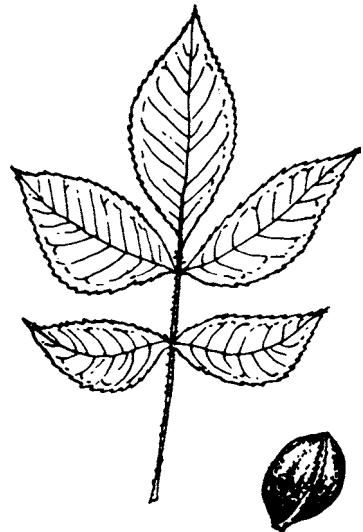

Alternate, Compound

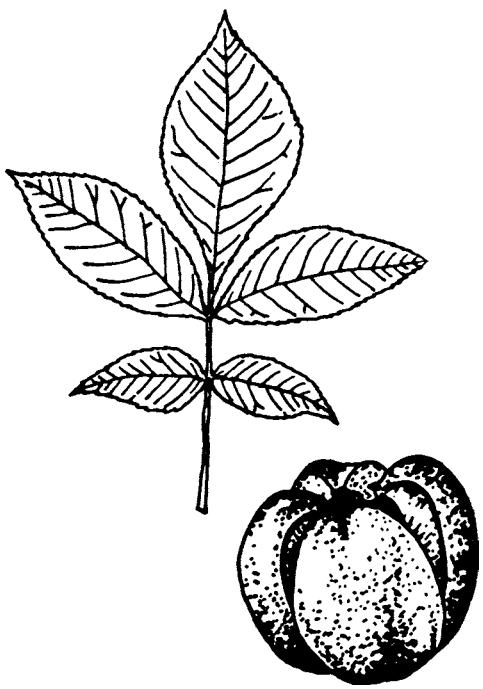

13. *Carya cordiformis*
Bitternut Hickory

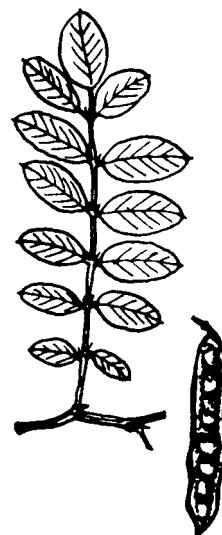

14. *Carya glabra*
Pignut Hickory

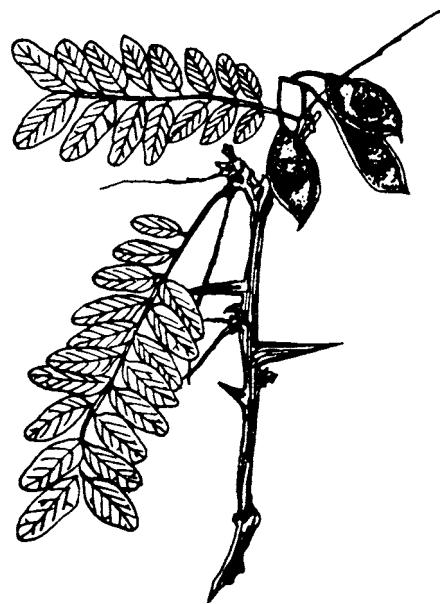

15. *Carya X ludoviciana*
Louisiana Hickory

16. *Carya ovata*
Shagbark Hickory

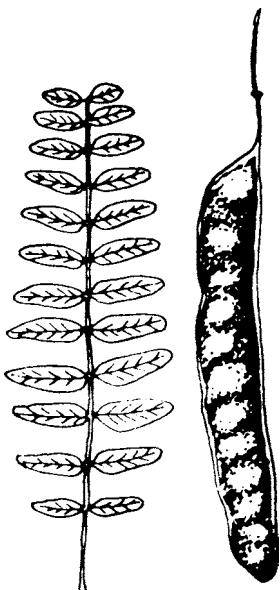

17. *Robinia pseudoacacia*
Black Locust

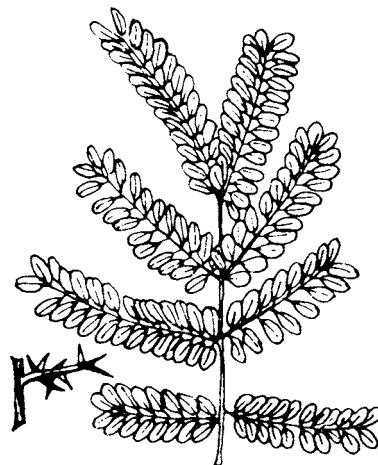

18. *Gleditsia aquatica*
Water Locust

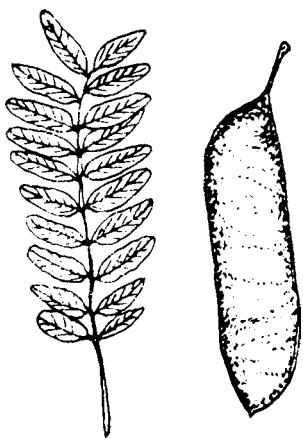

Alternate, Compound

19. *Gleditsia triacanthos*
Honey Locust
(compound leaf)

20. *Gleditsia triacanthos*
Honey Locust
(doubly compound leaf)

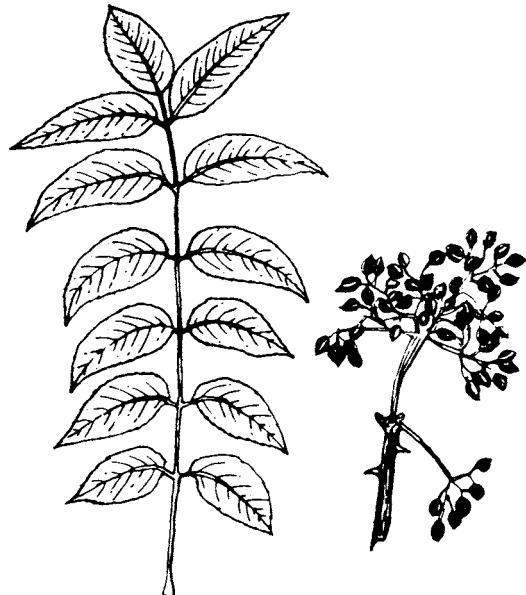

21. *Gleditsia X texana*
Texas Honey Locust

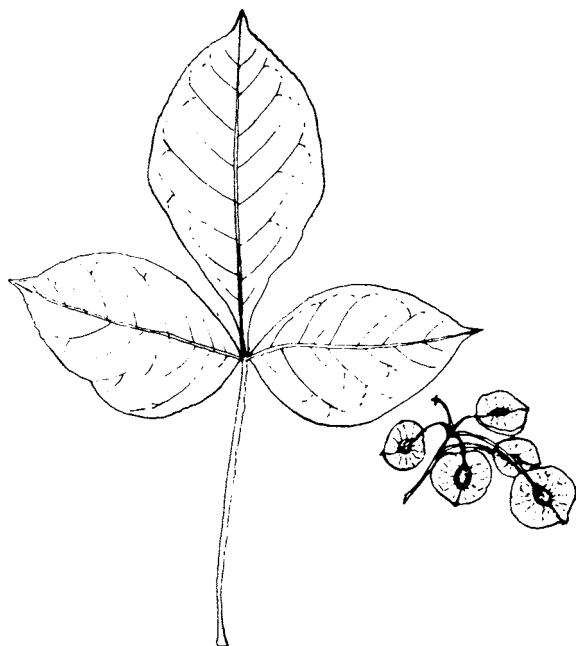

22. *Acacia parnesiana*
Opopanax

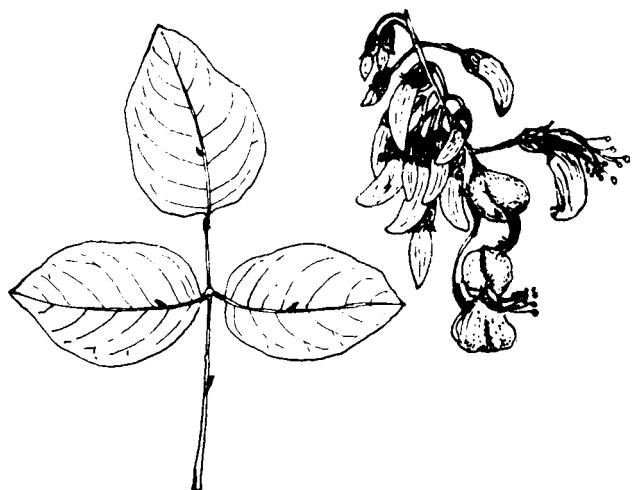

Alternate, Compound

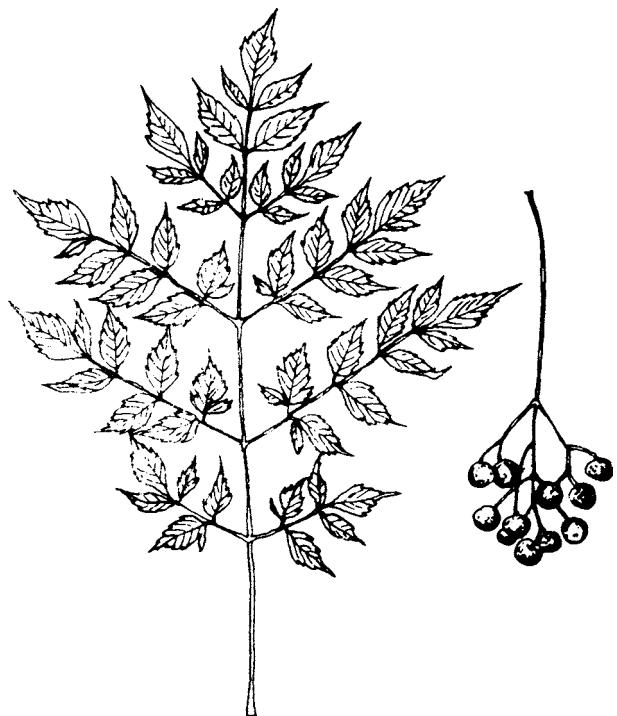

23. *Zanthoxylum clava-herculis*
Prickly Ash (Hercules-Club)

24. *Ptelea trifoliata*
Common Hoptree

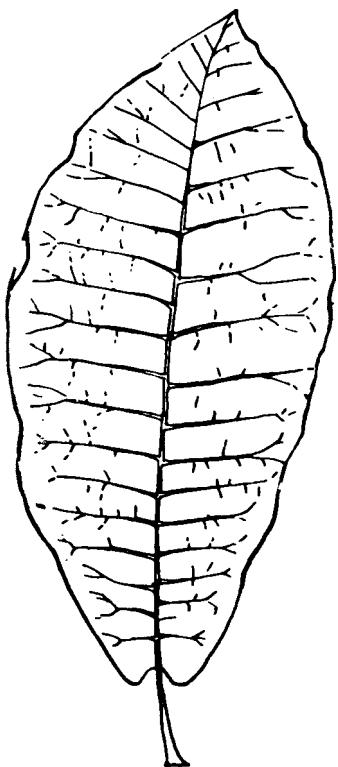

25. *Erythrina crista-galli*
Crybaby Tree

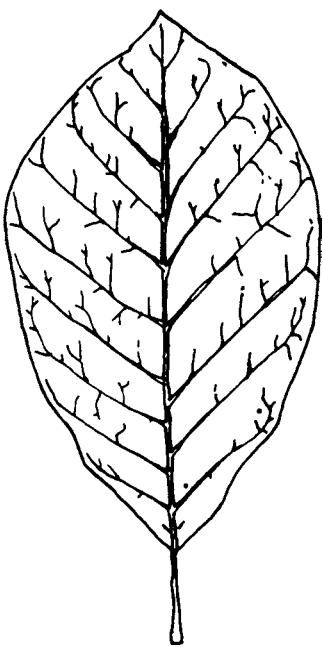

26. *Melia azedarach*
Chinaberry

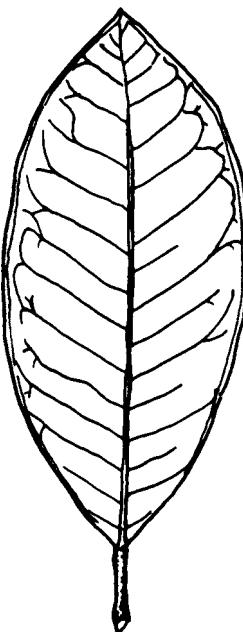

Alternate, Simple, Smooth

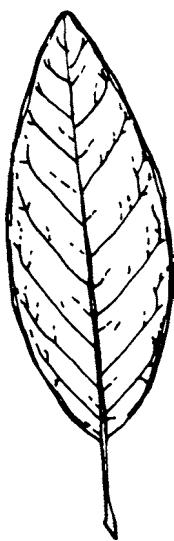

27. *Magnolia macrophylla*
Bigleaf Magnolia

28. *Magnolia pyramidata*
Cucumber Tree

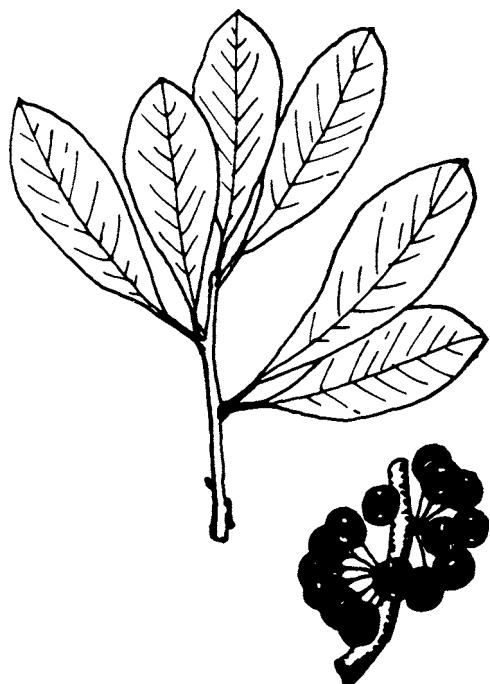

29. *Magnolia grandiflora*
Southern Magnolia

30. *Magnolia virginiana*
Sweetbay Magnolia

31. *Cyrilla racemiflora*
Swamp Titi

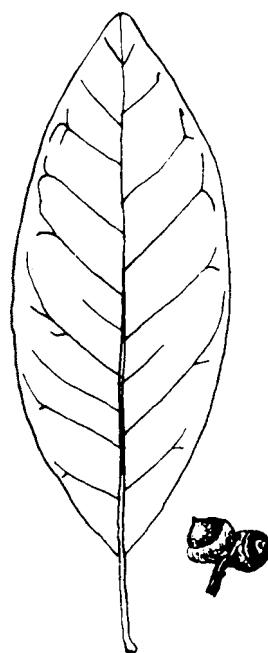

32. *Sideroxylon lycioides*
Chittumwood

Alternate, Simple, Smooth

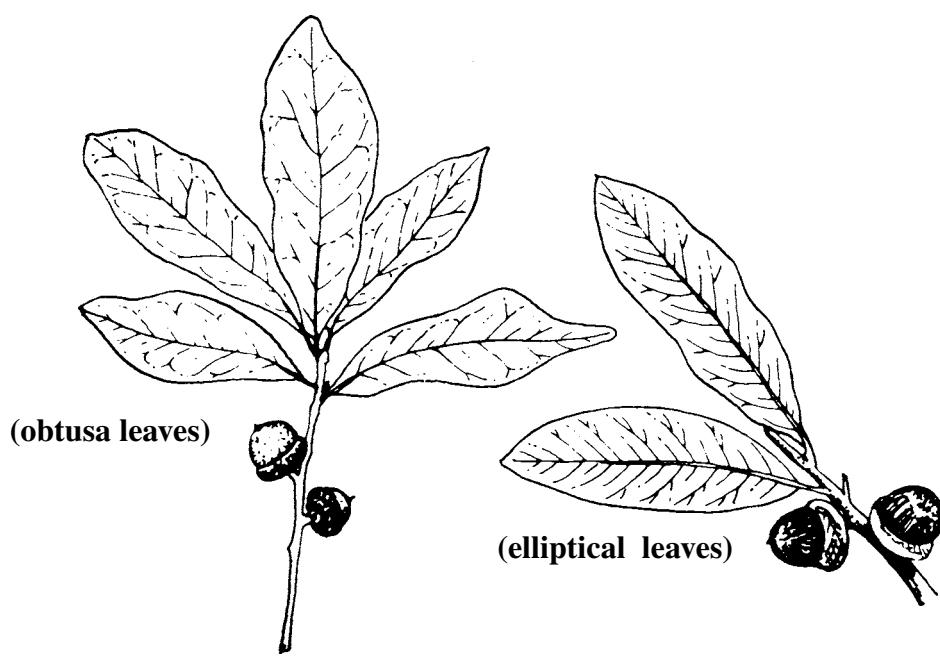

33. *Morella cerifera*
Wax Myrtle

34. *Quercus imbricaria*
Shingle Oak

35. *Quercus phellos*
Willow Oak

(obtusa leaves)

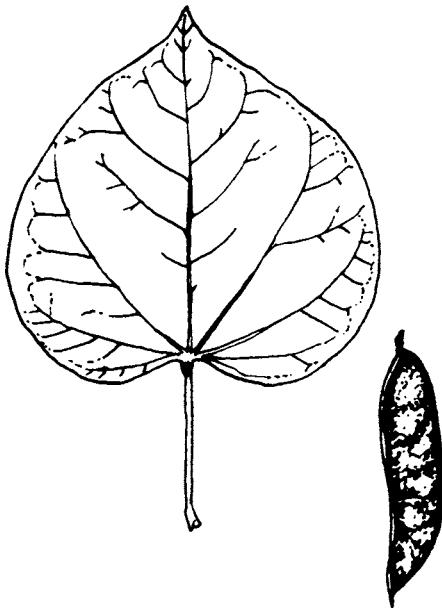

(elliptical leaves)

36. *Quercus laurifolia*
Laurel Oak

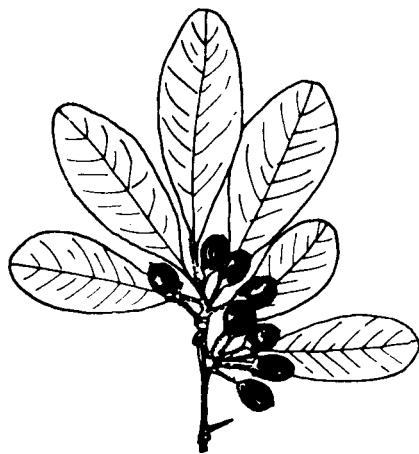

37. *Quercus virginiana*
Live Oak

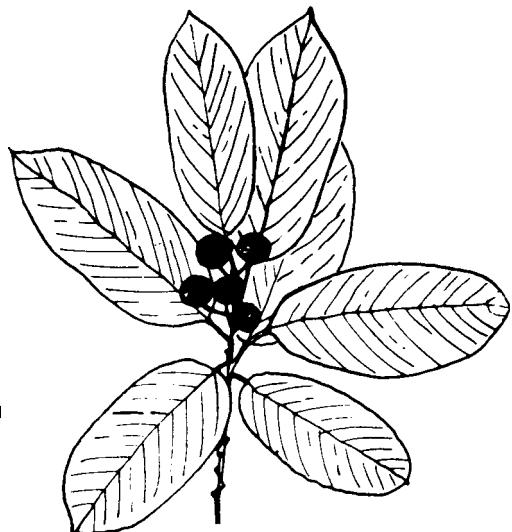

Alternate, Simple, Smooth

38. *Cercis canadensis*
Redbud

39. *Sideroxylon lanuginosum*
spp. lanuginosum
Buckhorn

40. *Frangula caroliniana*
Indian - Cherry

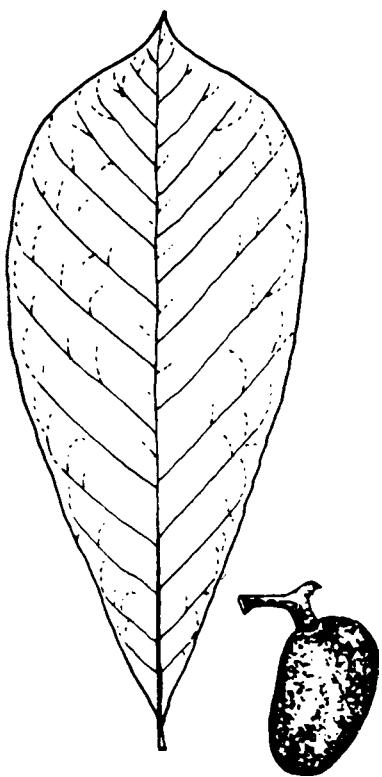

(smooth stem)

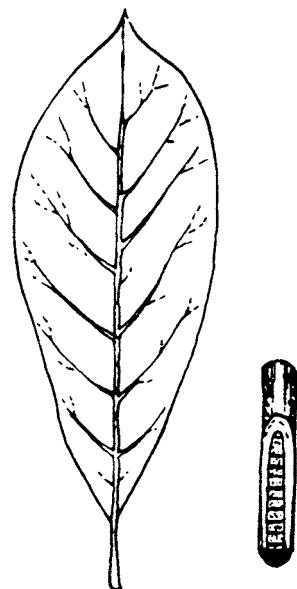

(hairy stem)

41. *Persea borbonia*
Redbay (swamp bay)

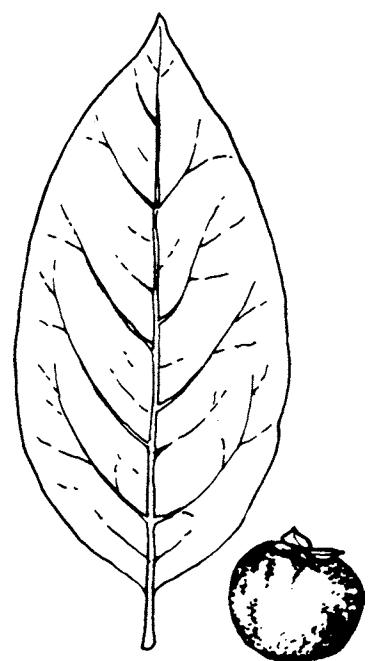

Alternate, Simple, Smooth

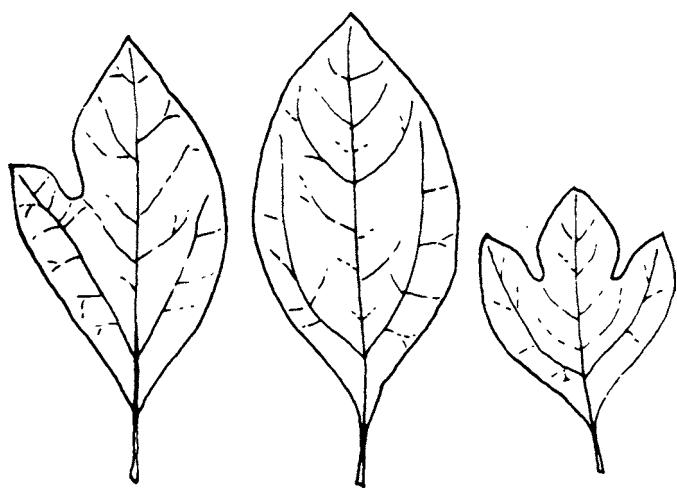

42. *Asimina triloba*
Pawpaw

43. *Nyssa sylvatica*
Blackgum

44. *Diospyros virginiana*
Persimmon

45. *Sassafras albidum*
Sassafras

46. *Maclura pomifera*
Osage-Orange

Alternate, Simple, Smooth

47. *Halesia diptera*
Silverbell

48. *Triadica sebifera**
Chinese Tallowtree

49. *Cinnamomum camphora**
Camphor-Tree

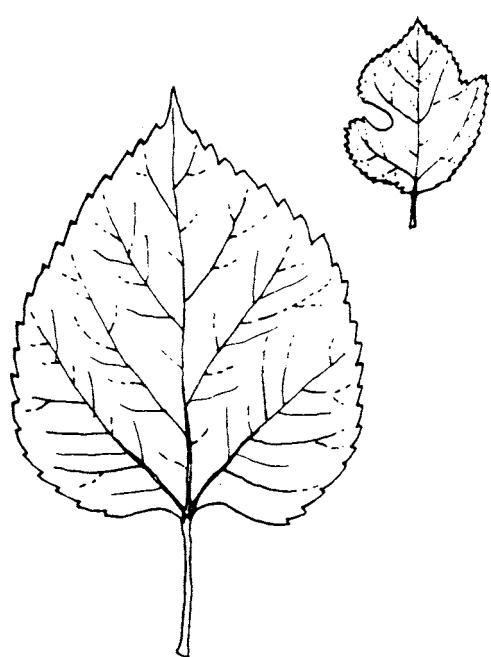

50. *Vaccinium arboreum*
Sparkleberry

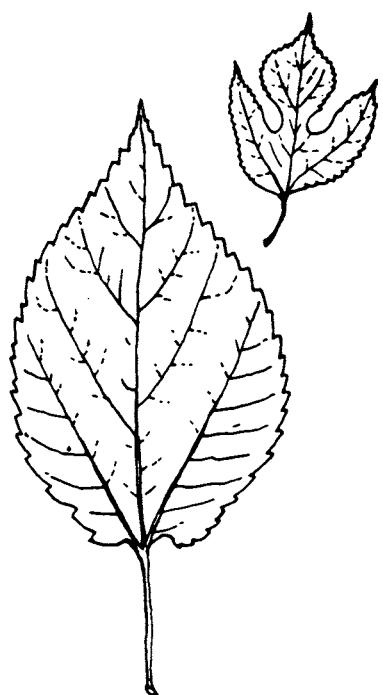

51. *Styrax grandifolia*
Snowbell

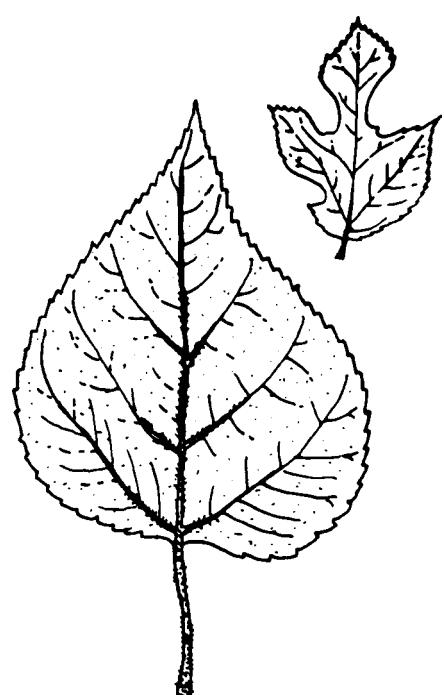

Alternate, Simple, Toothed

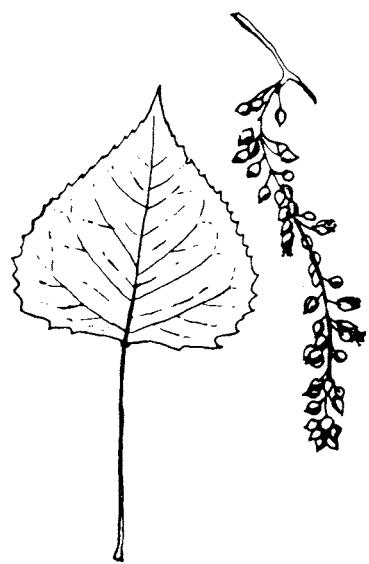

52. *Morus alba**
White Mulberry

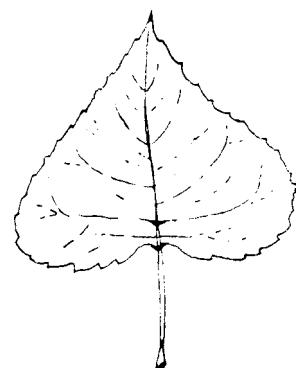

53. *Morus rubra*
Red Mulberry

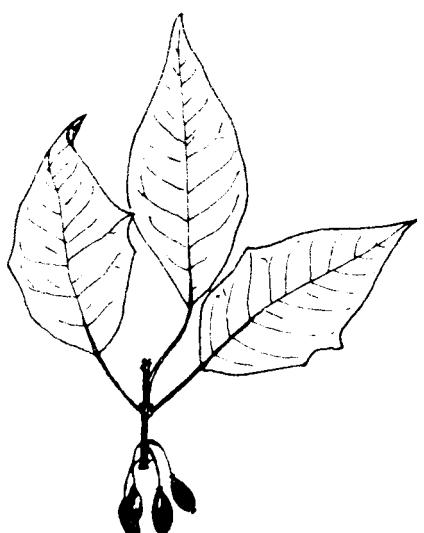

54. *Broussonetia papyrifera**
Paper Mulberry

55. *Populus deltoides*
Eastern Cottonwood

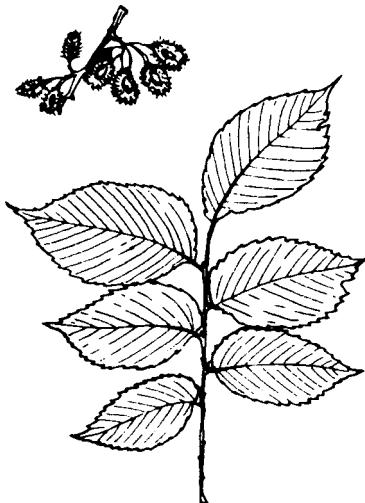

56. *Populus heterophylla*
Swamp Cottonwood

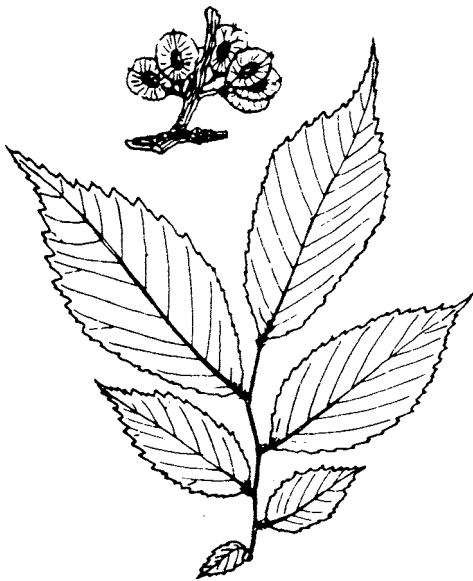

57. *Nyssa aquatica*
Tupelogum

Alternate, Simple, Toothed

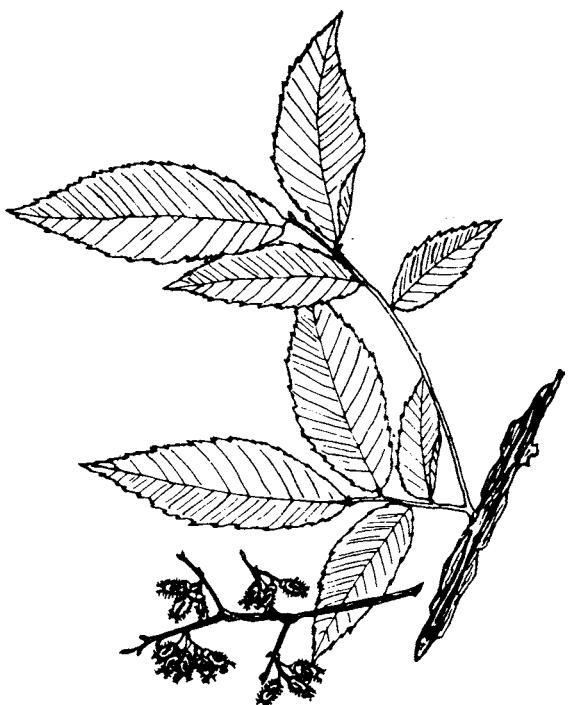

58. *Ulmus americana*
American Elm

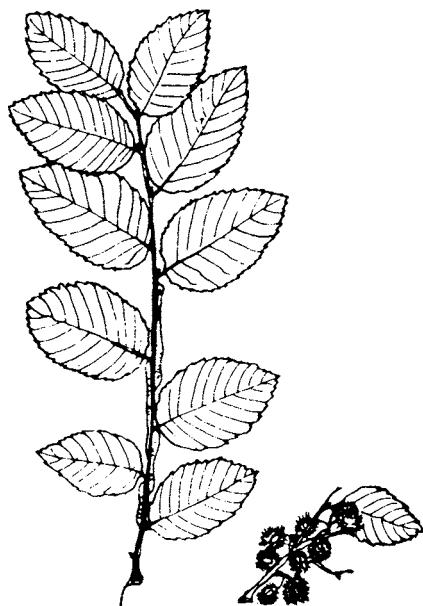

59. *Ulmus rubra*
Slippery Elm

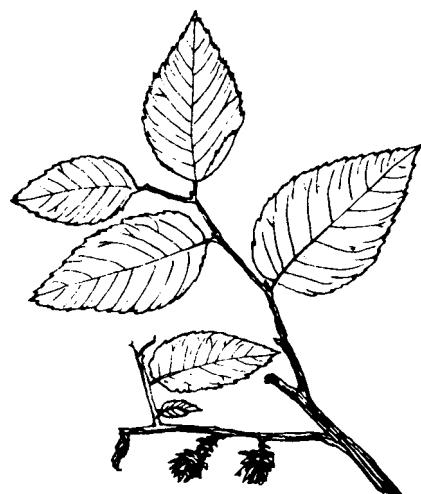

60. *Ulmus pumila**
Chinese Elm (Siberian Elm)

61. *Ulmus alata*
Winged Elm

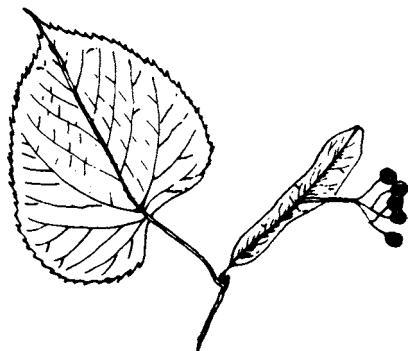

62. *Ulmus crassifolia*
Cedar Elm

63. *Planera aquatica*
Water Elm

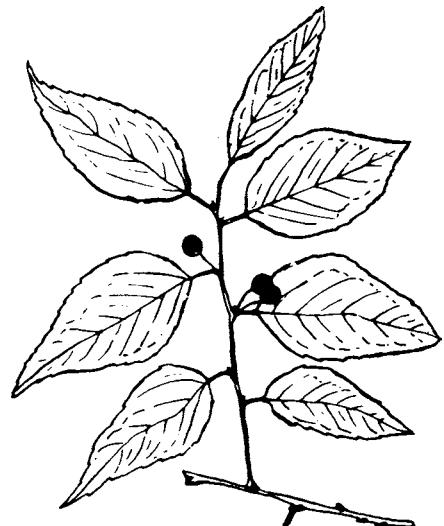

Alternate, Simple, Toothed

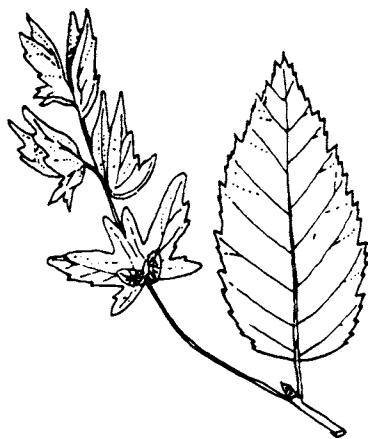

64. *Tilia americana* var. *caroliniana*
Basswood

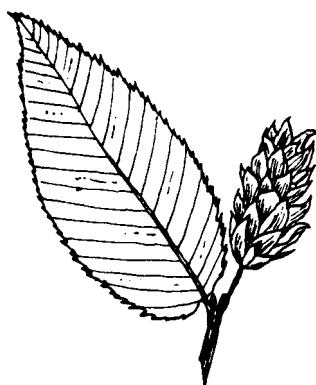

65. *Hamamelis virginiana*
Witch Hazel

66. *Celtis laevigata*
Hackberry (sugarberry)

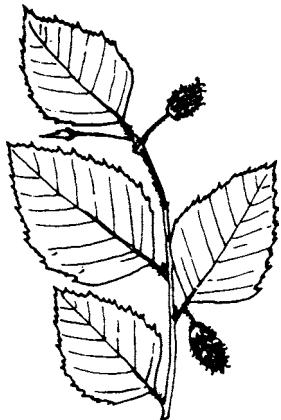

67. *Carpinus caroliniana*
Blue Beech

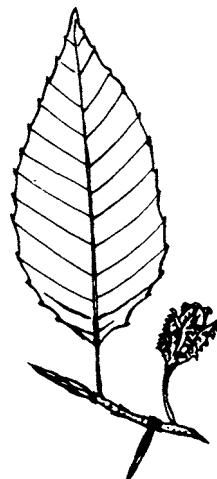

68. *Ostrya virginiana*
Hophornbeam

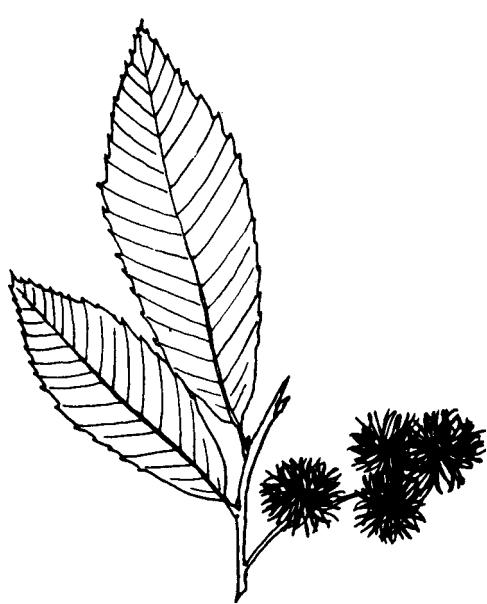

Alternate, Simple, Toothed

69. *Betula nigra*
River Birch

70. *Fagus grandifolia*
American Beech

71. *Castanea pumila*
Chinquapin

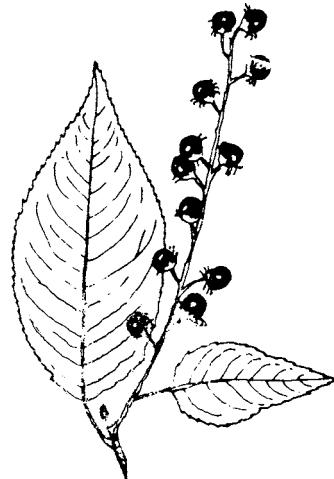

72. *Symplocos tinctoria*
Horsesugar

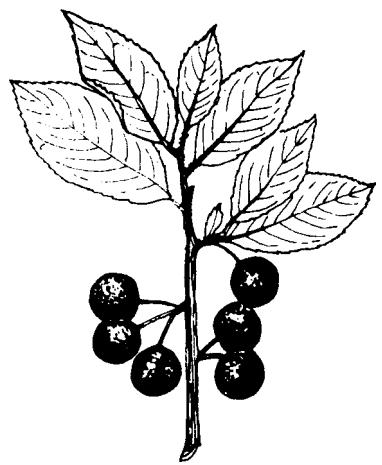

Alternate, Simple, Toothed

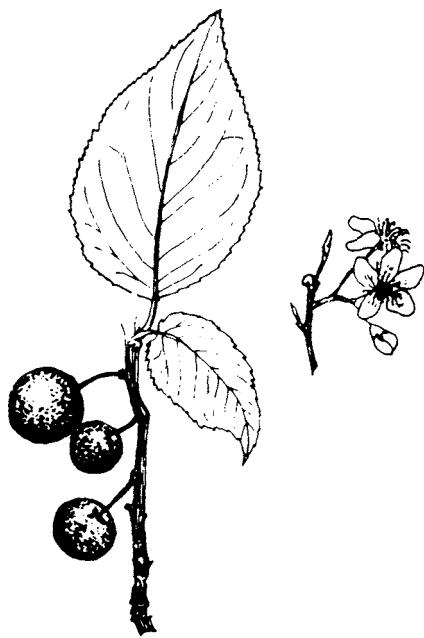

73. *Amelanchier arborea*
Service Berry (Shadblush)

74. *Prunus serotina*
Black Cherry

75. *Prunus umbellata*
Sloe

76. *Prunus mexicana*
Mexican Plum

77. *Prunus caroliniana*
Laurel Cherry

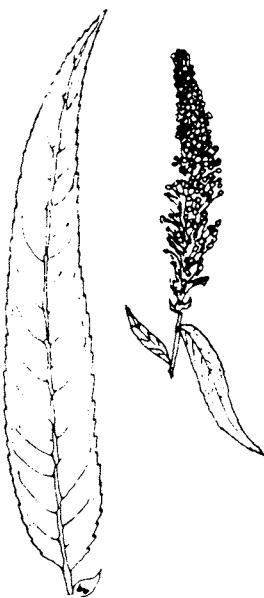

78. *Malus angustifolia*
Crap Apple

Alternate, Simple, Toothed

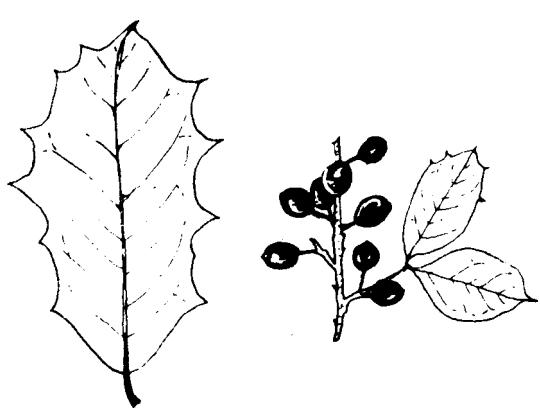

79. *Oxydendrum arboreum*
Sourwood

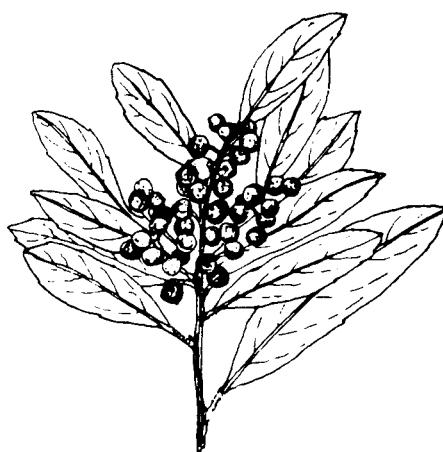

80. *Salix nigra*
Black Willow

81. *Salix interior*
Sandbar Willow

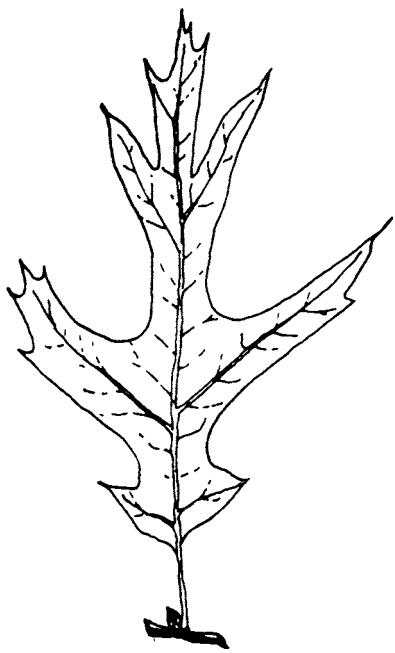

82. *Ilex opaca*
American Holly

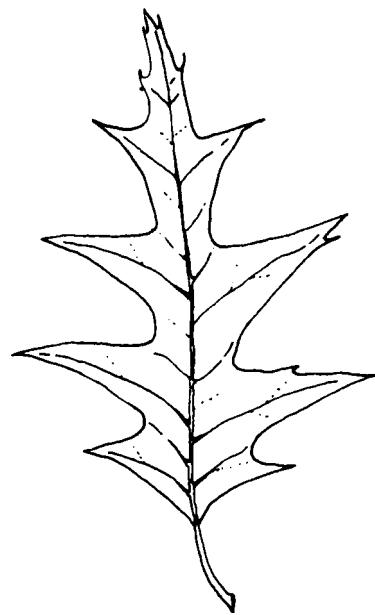

83. *Ilex cassine*
Cassine (dahoon)

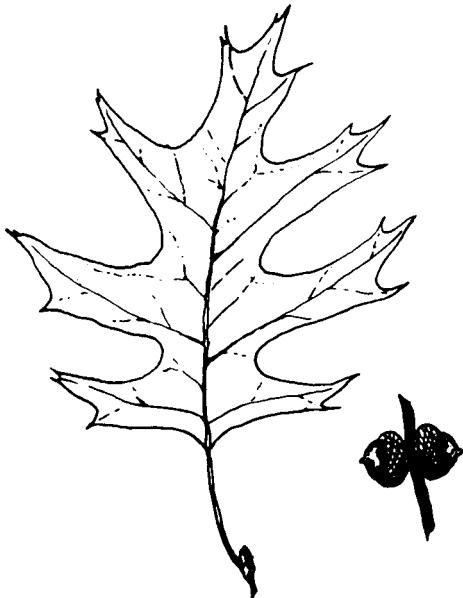

Alternate, Simple, Lobed

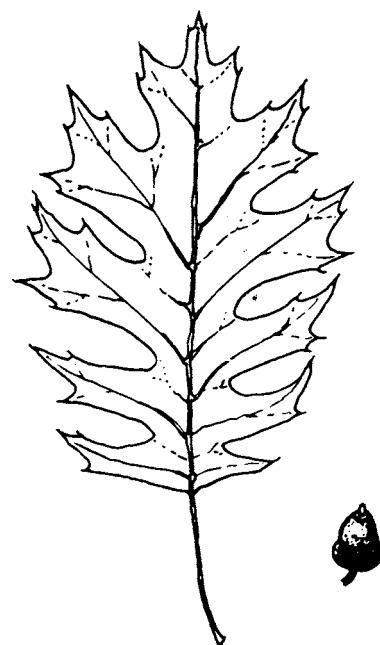

84. *Quercus falcata*
Southern Red Oak

85. *Quercus pagoda*
Cherrybark Oak

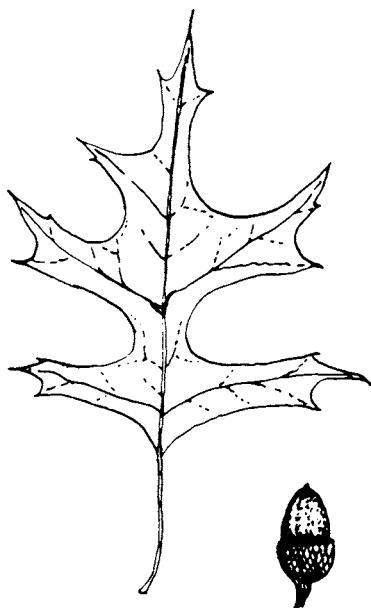

86. *Quercus velutina*
Black Oak

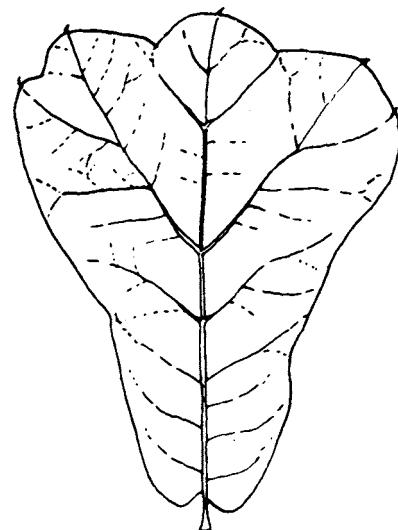

87. *Quercus shumardii*
Shumard Oak

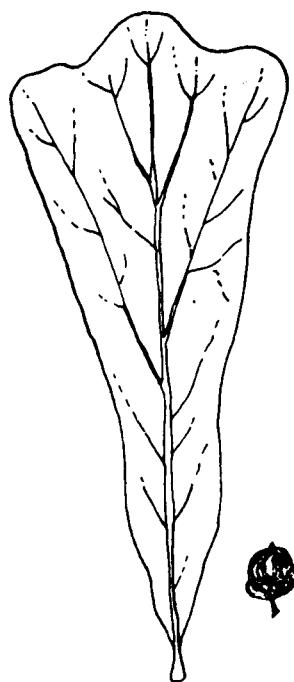

Alternate, Simple, Lobed

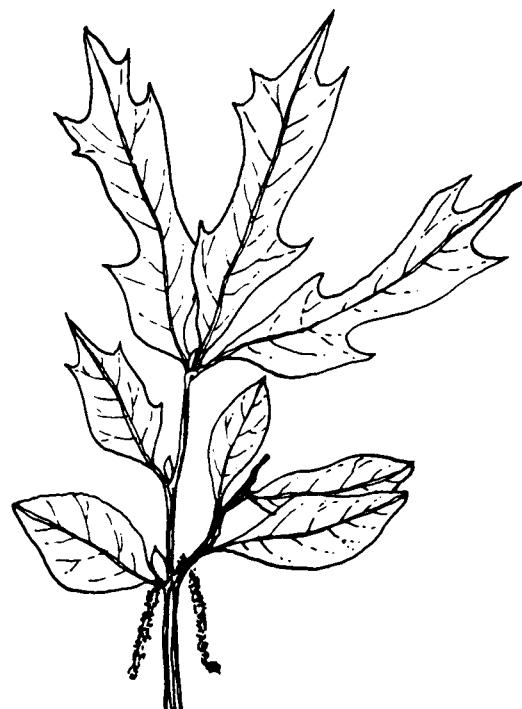

88. *Quercus buckleyi*
Nuttall Oak

89. *Quercus marilandica*
Blackjack Oak

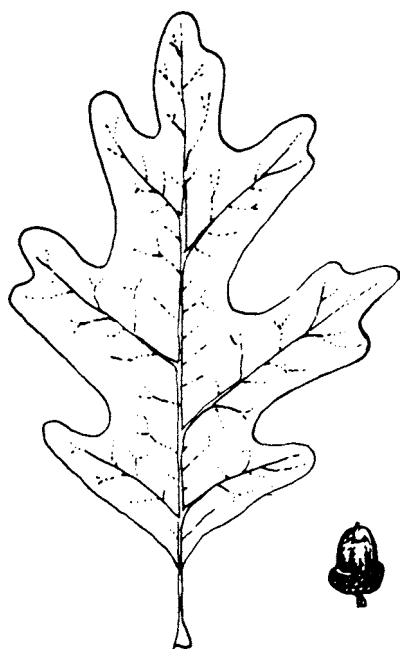

(large trees)

(Small trees)

90. *Quercus nigra*
Water Oak

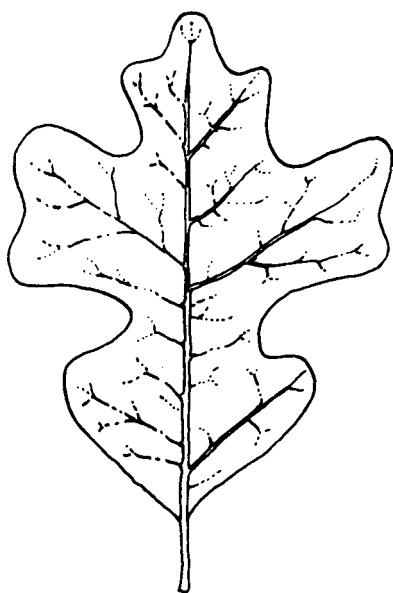

Alternate, Simple, Lobed

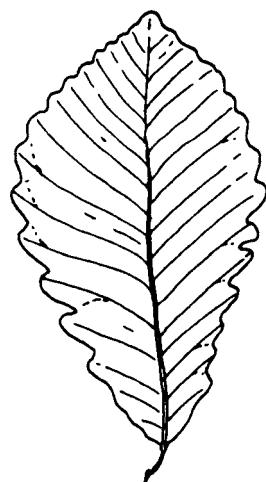

91. *Quercus alba*
White Oak

92. *Quercus macrocarpa*
Bur Oak

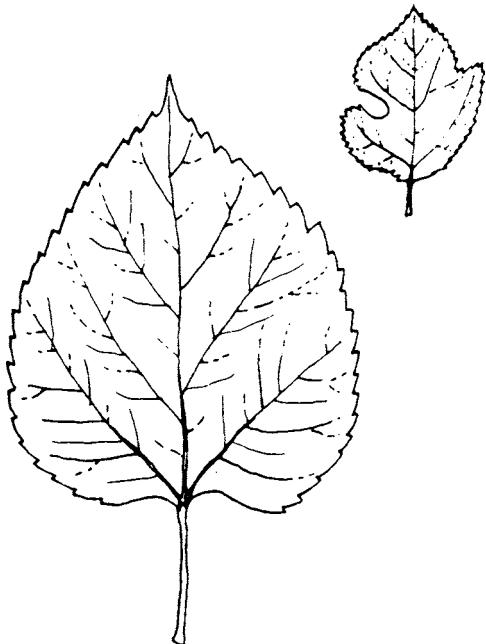

93. *Quercus stellata*
Post Oak

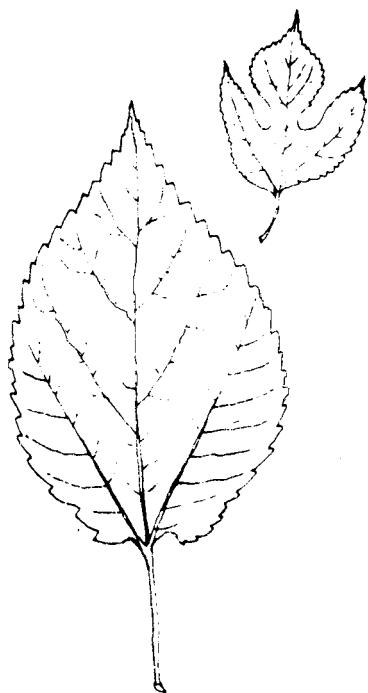

94. *Quercus michauxii*
Cow Oak (Chestnut Oak)

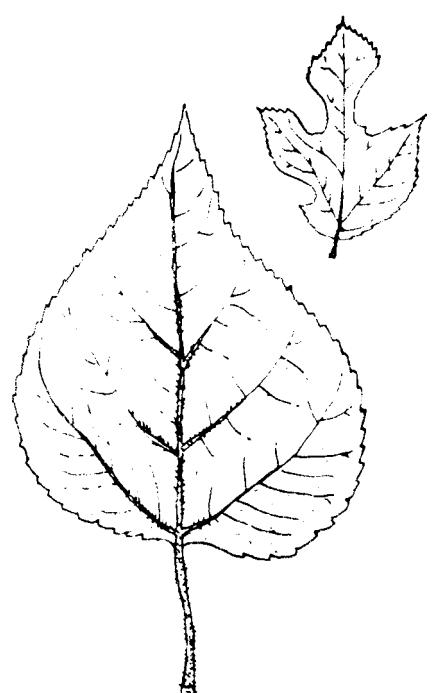

Alternate, Simple, Lobed

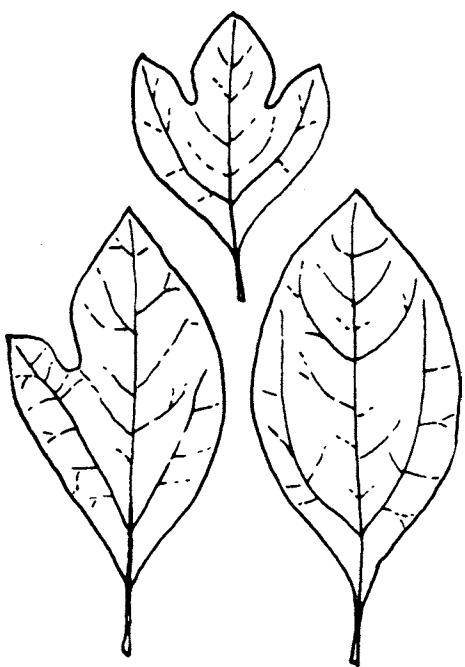

95. *Morus alba*
White Mulberry

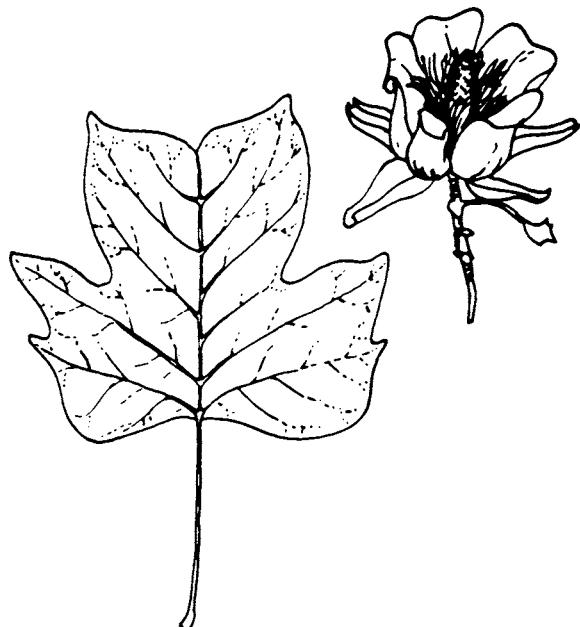

96. *Morus rubra*
Red Mulberry

97. *Broussonetia papyrifera*
Paper Mulberry

98. *Sassafras albidum*
Sassafras

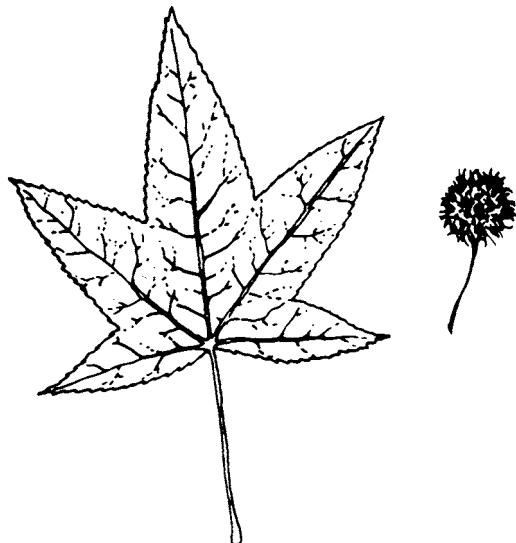

99. *Liriodendron tulipifera*
Tuliptree

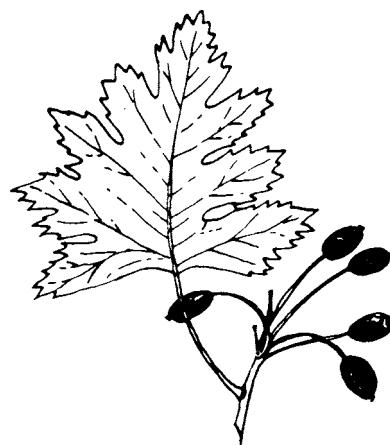

100. *Platanus occidentalis*
Sycamore

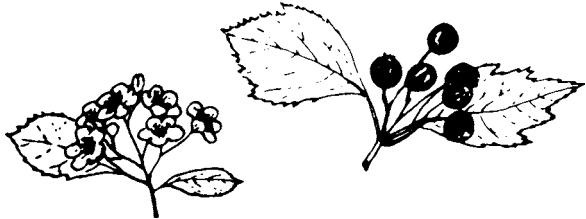

Alternate, Simple, Lobed

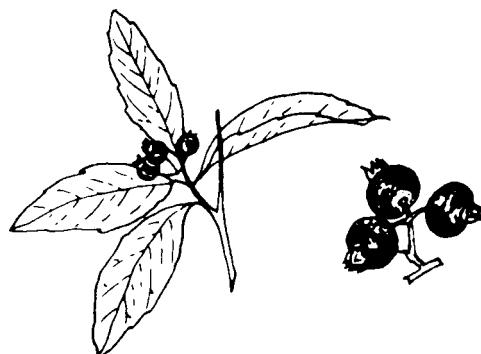

101. *Liquidambar styraciflua*
Sweetgum

102. *Crataegus marshallii*
Parsley Hawthorne

103. *Crataegus viridis*
Hog Haw (Green Haw)

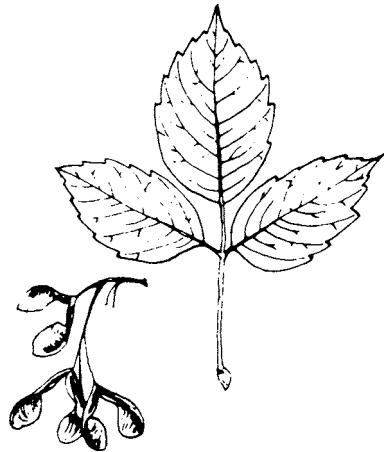

104. *Crataegus opaca*
May Haw

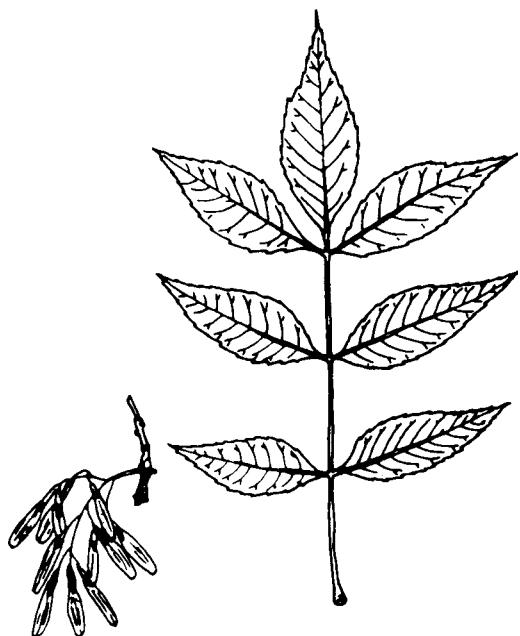

Opposite, Compound

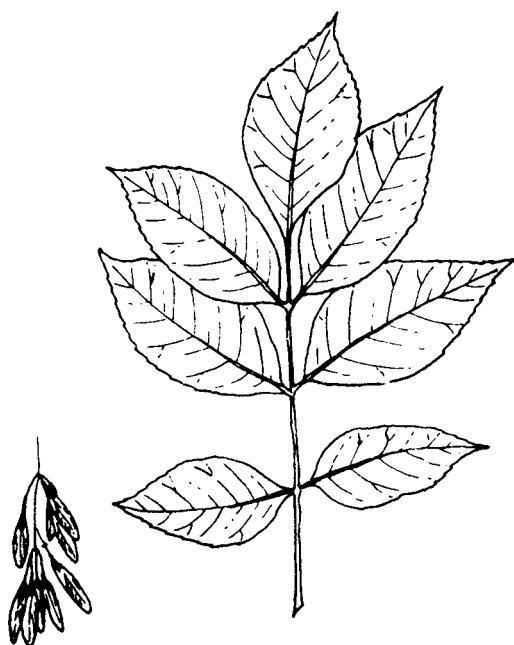

105. *Fraxinus americana*
White Ash

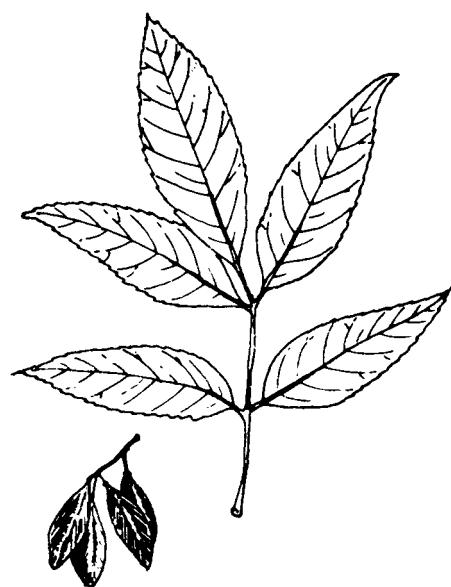

106. *Acer negundo*
Box Elder

107. *Fraxinus pennsylvanica*
Green Ash

108. *Fraxinus profunda*
Pumpkin Ash

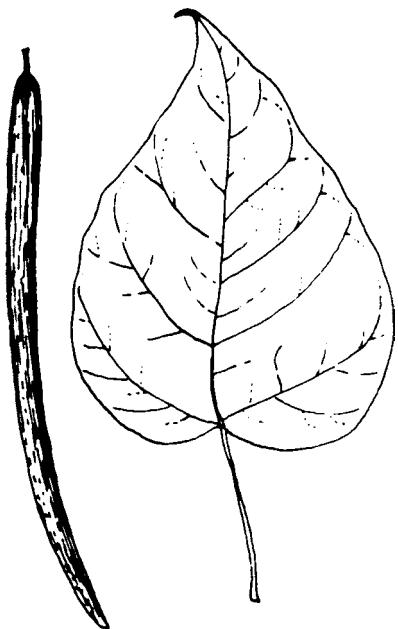

109. *Fraxinus caroliniana*
Water Ash

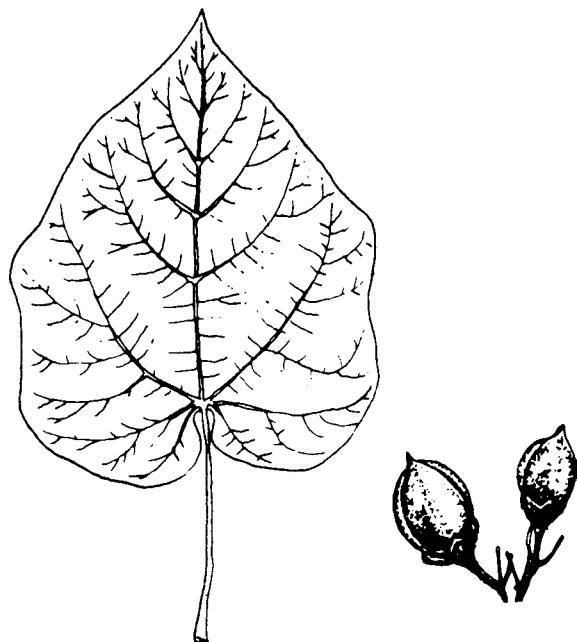

110. *Fraxinus berlandieriana*
Evergreen Ash
(Berlandier Ash)

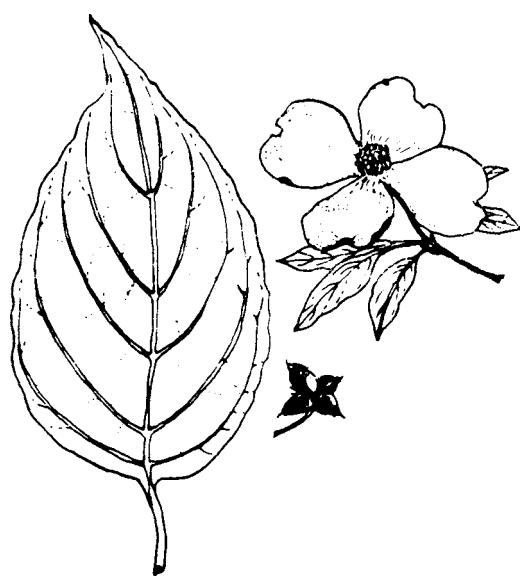

Opposite, Simple, Smooth

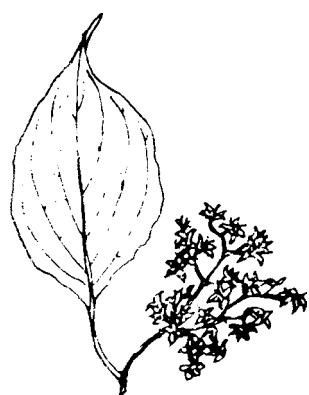

111. *Catalpa bignonioides*
Southern Catalpa

112. *Paulownia tomentosa**
Paulownia

113. *Cornus florida*
Flowering Dogwood

114. *Cornus drummondii*
Roughleaf Dogwood

Opposite, Simple, Smooth

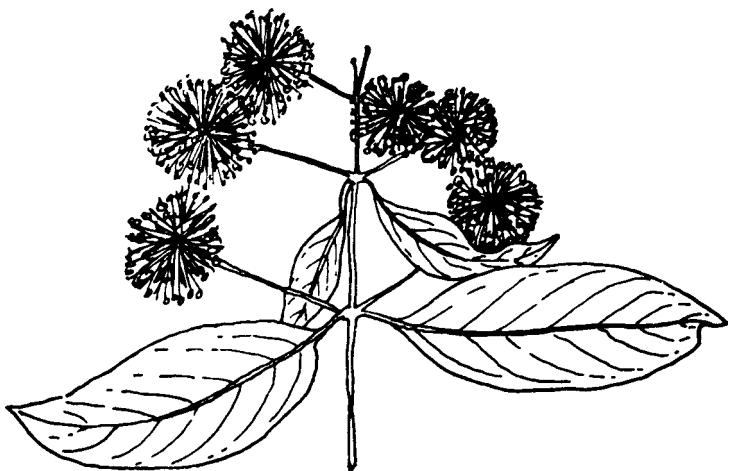

115. *Cornus foemina*
Bluefruited Dogwood
(stiffcornel dogwood)

116. *Osmanthus americanus*
Devilwood

117. *Chionanthus virginicus*
Fringetree

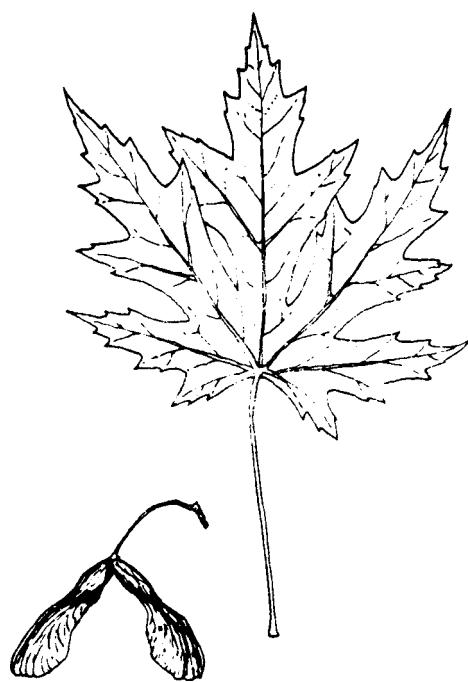

118. *Cephalanthus occidentalis*
Buttonbush

Opposite, Simple, Toothed

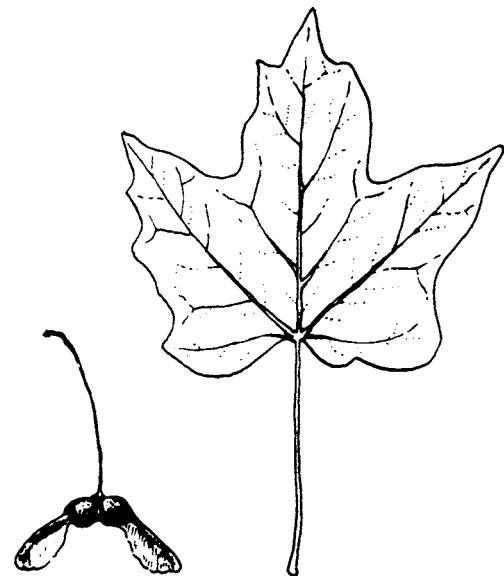

119. *Viburnum rufidulum*
Rusty Blackhaw

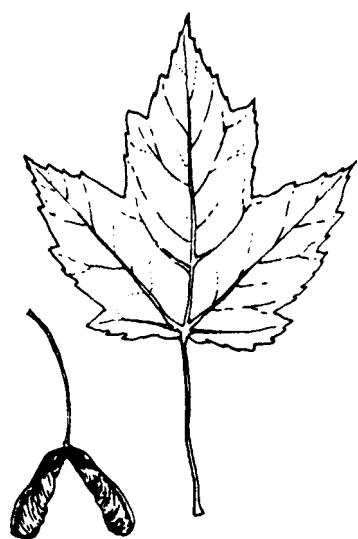

Opposite, Simple, Lobed

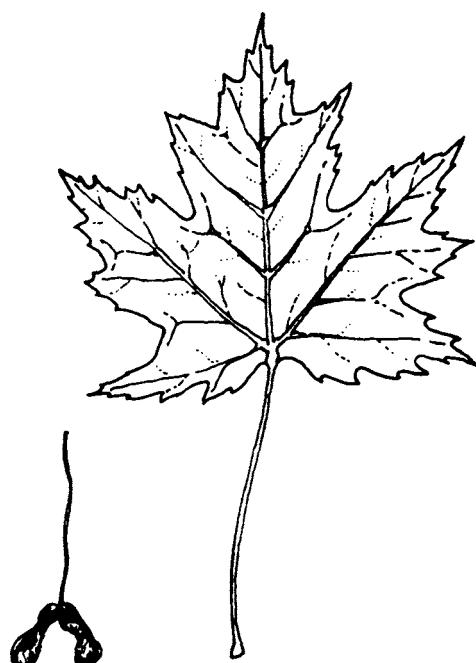

120. *Acer saccharinum*
Silver Maple

121. *Acer saccharum*
Sugar Maple

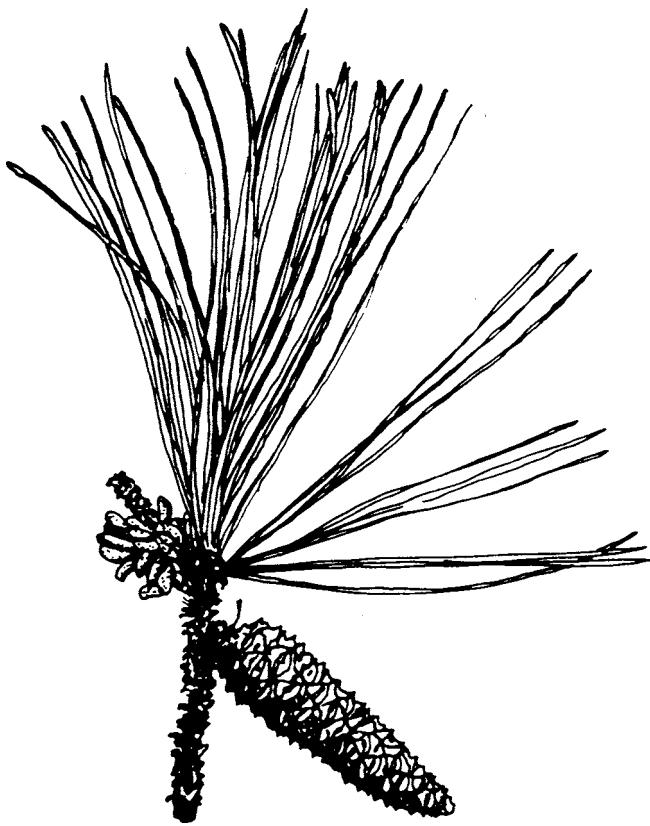

122. *Acer rubrum* var. *drummondii*
Drummond Red Maple

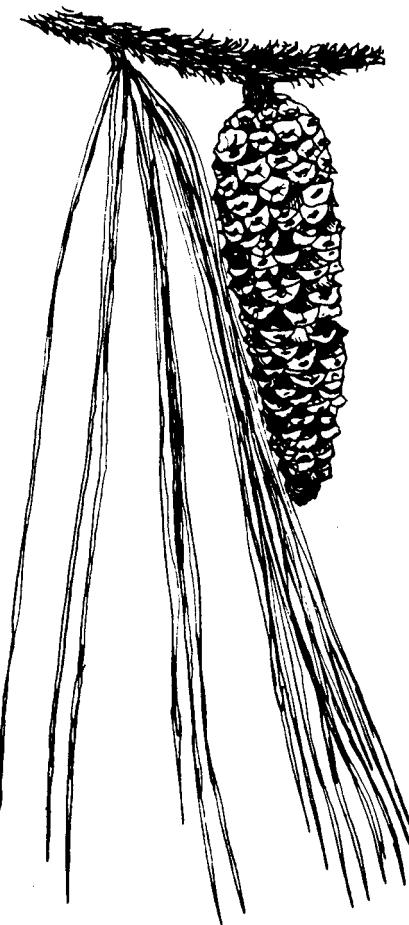

123. *Acer rubrum*
Red Maple

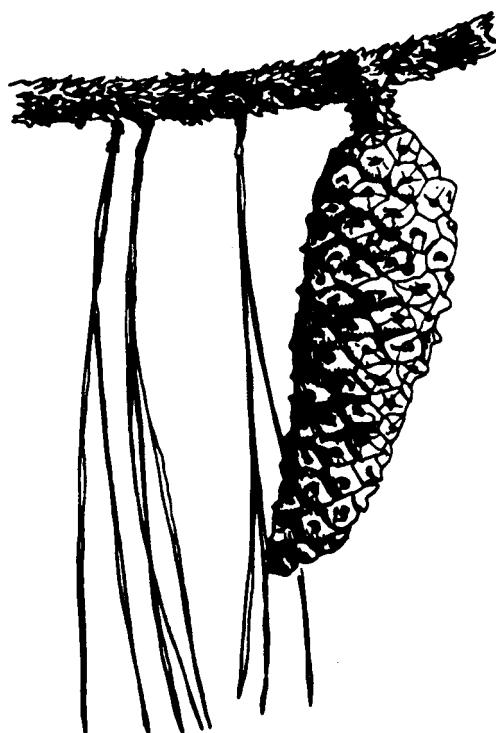

Leaves Needle-like

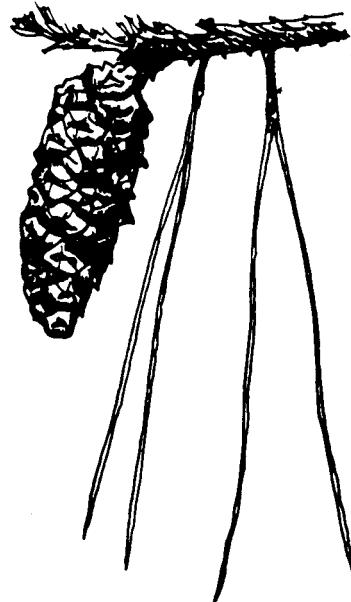

124. *Pinus taeda*
Loblolly Pine

125. *Pinus palustris*
Longleaf Pine

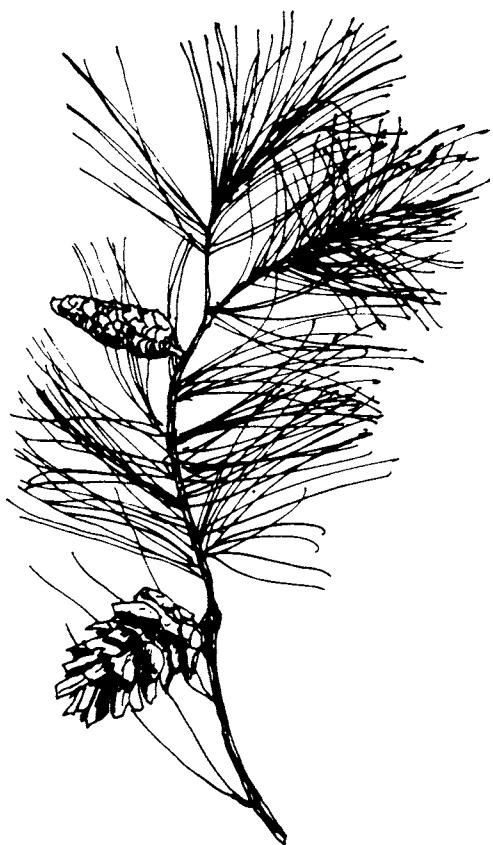

126. *Pinus elliottii*
Slash Pine

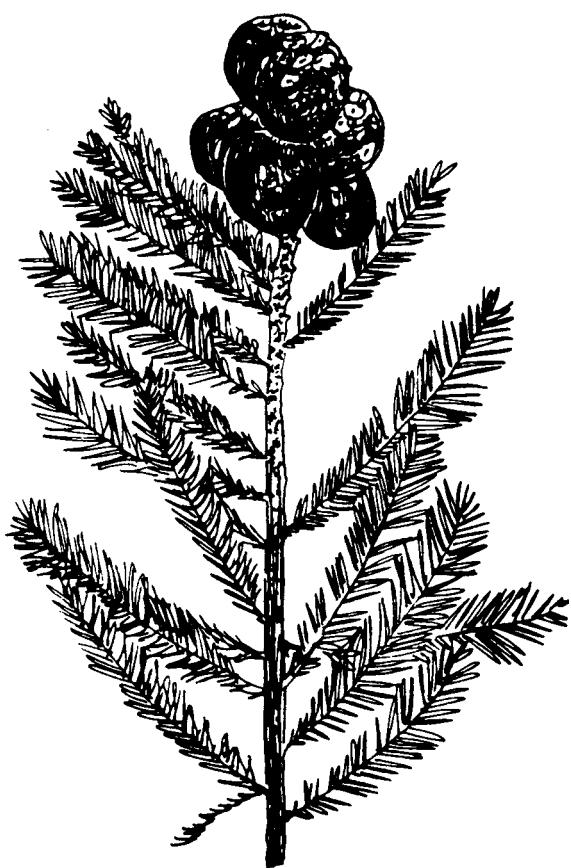

127. *Pinus echinata*
Shortleaf Pine

Leaves Needle-like

128. *Pinus glabra*
Spruce Pine

129. *Taxodium distichum*
Bald Cypress

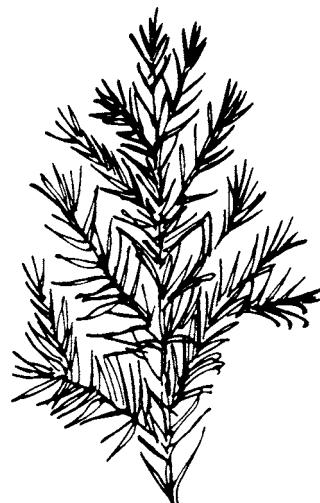

130. *Taxodium ascendens*
Pond Cypress

Leaves Scale-like

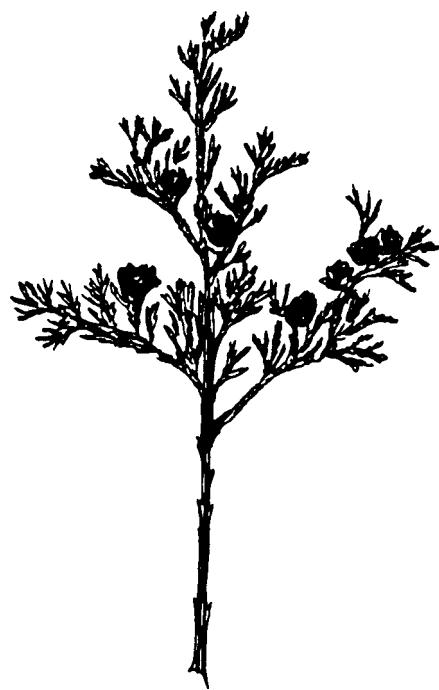

(older tree)

(young tree)

131. *Juniperus virginiana*
Red Cedar

132. *Chamaecyparis thyoides*
Southern White Cedar
